Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yurkewicz et al. (5,975,369) in view of Boissay (5,992,692).

Yurkewicz et al disclose, in fig. 2, a container closure comprising a shell 12, a tip 48 and a cover 16 having limitations substantially as claimed (also, see applicant disclosure in specification of the present application, page 3, paragraph (0009]), except Yurkewicz et al. do not disclose the cover including internally and radially extending ribs engagable with the tip when the cover is attached to the shell.

Boissay teach, in fig.1, a container closure comprising a cover 16 having internal and radially extending ribs 56 engagable with a tip 32 when the cover is attached to a shell 14.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the Yurkewicz et al. cover having extending ribs, as claimed, as taught by Boissay, in order to provide a guiding structure for a proper alignment of the cover at the tip during the closing of the cover.

Response to Arguments

3. Applicant's arguments filed 2/23/03 have been fully considered but they are not persuasive.

In response to applicant's argument that Boissay invention is non-analogous art, and no teaching or suggest of taking the ribs from a non-analogous structure of a non-analogous closure and placing them on the dust cover of the Yurkewicz patent. However, that is not found convincing because it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Yurkewicz disclose a container comprising a shell having a tip and a cover substantially as claimed, except Yurkewicz does not disclose internally extending ribs engagable with the tip when the cover is attached to the shell. Boissay teach, in fig.1, a container closure comprising a cover 16 having internal and radially extending ribs 56 engagable with a tip 32 of a closure shell 14 when the cover is attached to the shell .

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the Yurkewicz et al. cover having extending ribs, as claimed, as taught by Boissay, in order to provide a guiding structure for a proper alignment of the cover at the tip during the closing of the cover.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
